Education

國立政治大學

心理學系暨心理學研究所 | 碩士

Core Expertise

- 使用者研究
 - 使用者訪談與需求探索
 - 問卷、量表與行為觀察
 - 使用情境、痛點與服務流程分析
- UX架構與產品規劃
 - Problem Framing / User Flow
 - Information Architecture
 - Wireframe / Interactive Prototype
 - MVP、PoC與跨職能協作
- 研究與資料驗證
 - 實驗設計與研究規劃
 - 質量化資料整合
 - 統計建模與資料視覺化
 - 研究洞察轉譯

Tools

- Design & Prototyping
 - Figma · Illustrator · Photoshop
- Research & Analytics
 - Python · R · SPSS · JASP · MATLAB
 - SQL · Power BI · Excel
- Development & Collaboration
 - React · JavaScript · HTML/CSS
 - REST API · PostgreSQL · Git/GitHub

Profile

心理學與認知神經科學碩士，具使用者研究、行為分析、UX 架構規劃與 AI 產品原型經驗。擅長從市場脈絡、使用情境與量化證據中辨識需求，並將研究洞察轉化為資訊架構、互動流程與可驗證的產品方案。曾參與工研院新創產業研究、半導體資料庫與資料平台建置，並主導 Emobot AI 數位心理支持系統之問題定義、使用者研究、服務流程與技術整合。能在使用者需求、產品目標與技術限制之間建立清楚的決策邏輯，與產品、設計及工程團隊共同推進 0-to-1 產品開發與驗證。

Selected Product Case

Emobot+ | AI 數位心理支持系統

UX Research | Interaction Design | AI Product Prototype

- 針對校園心理支持資源有限、等待時間長、求助污名與即時支持不足等問題，規劃匿名、低門檻且具專業轉介邊界的數位支持服務。
- 執行使用者研究、質性訪談與情境分析，整理學生在情緒支持、信任、隱私與正式求助歷程中的需求及阻礙。
- 將研究洞察轉化為心理特質媒合、AI 角色推薦、情緒適應型對話、情緒紀錄、風險偵測與心理師轉介等核心流程。
- 規劃資訊架構、User Flow 與 Figma 高保真原型，並參與前後端功能、API 與資料庫邏輯整合。

Relevant Experience

工業技術研究院

2024/04 - 2026/03

研究助理 | 產業研究、資料產品與科技情報平台

- 蒐集並分析國內外新創企業、技術分類、產業鏈與市場趨勢，將分散資訊轉化為研究洞察與產品規劃依據。
- 參與台灣新創基盤與半導體產業資料庫建置，規劃分類架構、資料欄位、品質檢核與持續更新流程。
- 主責 go-to-market 新創商情平台之需求梳理、資訊架構、介面流程與前後端功能整合，將研究資料轉化為可操作的線上產品。

台灣心智科學腦造影中心

2022/07 - 2026/03

兼任研究助理 | 人類行為大腦、認知神經科學研究

- 規劃並執行 fMRI、認知與生理實驗，涵蓋受試者招募、實驗刺激設計、數據收集管理、資料統計分析、研究報告發表。
- 整合行為表現、主觀投入與神經影像資料，分析社會訊息提示方式、如視覺影像、聲音畫面等，對於注意力、受試者投入程度及學習表現的影響、同步影響大腦神經連結強度。

兒童暨家庭關懷協會

2022/07 - 2026/03

兼任計畫助理 | 服務研究與成效評估

- 整合年度個案與服務資料，執行資料清理、統計分析與視覺化，建立服務成效評估架構。
- 與心理師及社工師共同解讀資料，將研究發現轉化為服務調整、表單優化與計畫決策依據。

心理衛生中心

2023/06 - 2023/09

兼任計畫助理 | 心理健康資料與服務流程

- 分析心理衛生服務個案資料，建立統計流程並產出服務規劃與成果報告。
- 依據諮詢情境與使用者需求設計服務表單，並優化網站資訊架構、導覽邏輯與資源取得流程。

Recognition

- 2025年 AI 跨域永續創新競賽亞軍 | Emobot+ AI 數位心理支持系統
- 2025年 碩士論文優等獎 | 台灣認知神經科學年會
- International Poster Presentation | OHBM Annual Meeting 2025, Australia
- 教育部青年百億海外圓夢計畫 | 青年科技創新國際組 2026, Germany

Education

National Chengchi University
M.S. in Psychology
Department and Graduate Institute of Psychology

Core Expertise

User Research

- User interviews and needs discovery
- Surveys, psychological assessments, and behavioral observation
- User context, pain point, and service journey analysis

UX Architecture & Product Planning

- Problem framing and user flows
- Information architecture
- Wireframing and interactive prototyping
- MVP, PoC, and cross-functional collaboration

Research & Data Validation

- Experimental design and research planning
- Qualitative and quantitative data integration
- Statistical modeling and data visualization
- Translation of research insights into product decisions

Tools

- **Design & Prototyping**
 - Figma · FigJam · Illustrator · Photoshop
- **Research & Analytics**
 - Python · R · SPSS · JASP · MATLAB
 - SQL · Power BI · Excel
- **Development & Collaboration**
 - React · JavaScript · HTML/CSS
 - REST API · PostgreSQL · Git/GitHub

Profile

Psychology and cognitive neuroscience professional with experience in user research, behavioral analysis, UX planning, and AI product prototyping. Skilled at translating user needs and quantitative evidence into clear product flows and testable solutions.

At the Industrial Technology Research Institute, I contributed to startup research, semiconductor databases, and data-platform development. I also led user research, service design, and technical integration for Emobot+, an AI-powered mental health support system, working across product, design, and engineering to support 0-to-1 development and validation.

Selected Product Case

Emobot+ | AI-Powered Digital Mental Health Support System

UX Research | Interaction Design | AI Product Prototype

- Designed a low-barrier digital support service addressing limited campus mental health resources, long waiting times, help-seeking stigma, and insufficient access to immediate emotional support.
- Conducted user research, qualitative interviews, and contextual analysis to identify students' needs and concerns regarding emotional support, trust, privacy, and professional help-seeking.
- Translated research insights into psychological needs matching, AI companion recommendations, emotion-adaptive conversations, mood tracking, risk detection, and professional referral flows.
- Developed the information architecture, user flows, and high-fidelity Figma prototype, while contributing to front-end and back-end integration, API workflows, and database logic.

Relevant Experience

Industrial Technology Research Institute 2024/04 - 2026/03

Research Assistant | Industry Research, Data Products & Technology Intelligence

- Collected and analyzed data on domestic and international startups, technology categories, industry value chains, and market trends, transforming fragmented information into research insights and product-planning inputs.
- Contributed to Taiwan startup and semiconductor databases by defining taxonomy structures, data fields, quality-control rules, and continuous update workflows.
- Led requirements analysis, information architecture, interface flows, and front-end and back-end integration for a go-to-market startup intelligence platform, transforming research data into an operational online product.

Taiwan Mind and Brain Imaging Center 2022/07 - 2026/03

Research Assistant | Human Behavior, Brain Imaging & Cognitive Neuroscience

- Planned and conducted fMRI, cognitive, and physiological studies, including participant recruitment, experimental task design, data collection, statistical analysis, and research reporting.
- Integrated behavioral, self-report, and neuroimaging data to examine how audiovisual information influences attention, engagement, learning performance, and functional brain connectivity.

Children and Family Care Association 2022/07 - 2026/03

Project Assistant | Service Research & Outcome Evaluation

- Integrated annual case and service data, conducted data cleaning, statistical analysis, and visualization, and developed an outcome-evaluation framework for service improvement.
- Collaborated with psychologists and social workers to interpret findings and translate research insights into service adjustments, form optimization, and program-planning decisions.

Mental Health Center 2023/06 - 2023/09

Project Assistant | Mental Health Data & Service Design

- Analyzed mental health service data, established statistical workflows, and produced reports to support service planning and outcome evaluation.
- Designed consultation forms based on user needs and service contexts, while improving website information architecture, navigation, and access to mental health resources

Recognition

- Runner-up | 2025 AI Interdisciplinary Sustainability Innovation Competition
- Excellent Master's Thesis Award | TSCN Annual Meeting 2025
- International Poster Presentation | OHBM Annual Meeting 2025
- Selected Participant | Youth Overseas Dream Program, Berlin 2026
